WINDOW & DOOR INSTALLATIONS

AXIOM
WINDOWS & DOORS

How do they work:

- Installed inside the double glazed sealed units
- Slat raising, lowering and tilting function is achieved using a magnetic transmission through the glass
- Simple and easy to use and functions with surprising grace and speed.
- Raise, lower and tilt functionality is achieved by simply sliding the push block

Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using a magnetic slider for up/down & tilt functions.
- Optimum control of light and heat in room.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.

Electronic Blinds

How they work:

- They are battery operated using the actuator provided with no electrician needed.
- Actuators are charged automatically using solar panels and operate the blinds with raising, lowering and tilting function.
- Remote controlled.

Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Optimum control of light and heat in rooms.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind with no cords.
- Solar powered - no need for an electrician to install
- Slats are able to tilt to different angles

Remote Control

Smart System main features and benefits

- ✓ No need for electrician to install
- ✓ LED illuminated touch control keys
- ✓ Batteries recharged easily by connecting a micro-USB cable every 1-3 months
- ✓ Small, sleek battery module, developed in co-operation with Italian design specialists
- ✓ Battery module is super-hygienic thanks to the patented Sanitized® antimicrobial technology applied to it, offering a long-lasting protective function.
